2015 Review

THAT'S A WRAP

Billiani introduced a new multi-purpose chair, now available in the UK from Design & Contract Furniture. The new Billiani 'Wrap' chair is the company's latest addition to its growing collection and is an affordable yet high quality, stylish option for large scale seating requirements in restaurants, cafes and bars. The versatile seat can also be used for reception areas and rooms in hotels that wish to add an element of class and comfort to their customer seating areas. The chair takes its inspiration from one of Billiani's existing top end products and the original of its kind, the 'Croissant' chair, designed by Emilio Nanni. Although made to a lower price point, the new Wrap chair still reflects the elegance and beauty that comes with the Billiani name. The Wrap chair expresses pure quality and elegance from its beech wood frame through to its seamless curved back and arm support. The chair's design conceals all fixtures for an immaculate appearance compared with others on the market. The Wrap chair can be ordered in a wide selection of colours and fabrics to match or contrast with any colour scheme, using Billiani's range of fire retardant materials.
