# Billiani srl

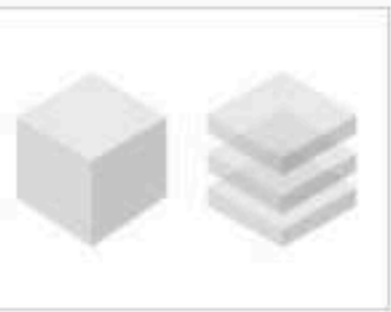

Wood was in our hearts right from the start, and as soon as we were born we had solid roots, firm and deep convictions. This attachment clearly made us stand out at once. In wood we have, from time to time, reread the traces of our past to make them become thoughts, plans, and new ideas. Over the course of a whole century architecture, fashion, clothing, design, art and lifestyles have changed rapidly, almost overwhelming us. The Billiani product range has constantly been enriched, leading to fruitful relationships with designers, looking for a balance between practicality and creativity. With the desire to produce beautiful seating, yes, seating to let dreams rest easy, and to respond to these ever-changing lifestyles

Nostalgia and contemporaneity. A collection distinguished by its precise dimensioning, which draws again the modern version of the classic "rung chair". This is an archetypal shape, which is updated by redesigning a product from past memories and fits in both at home and in any contract situation where a feeling of vintage design is desired.

Full and proportionate lines and formal harmony for an "iconic" item. This prestigious collection is distinguished by strength of structure which is balanced by a seat and back profile with powerful identity bringing life to a product with a vibrant personality, which declares its formal solidity and contemporary style.  
Great ergonomic care is given to comfort and to a stylish use which can enhance any area at home or in any contract situation, wherever a feeling of design, prestige and refinement is desired.  
The Croissant collection includes chair, armchair and lounge chair.  
With a beech structure, upholstered seat and back available in natural beech finish or bleached, coupled with a wide range of colours for the fabrics. The single colour versions enhance this item as the perfect match is found between the frame finishes and the fabric, leather and leatherette upholsteries, choosing from neutral and natural tones and black, mud grey, white and bright ones such as yellow, red, octane blue.
